

Access Panel Installation

Typical Access Column

The AGCI Concerto™ Wall System is comprised of a combination of separate aluminum extrusions. These consist of wall trim, vertical splines, inside and outside corner trim, as well as perimeter and base trim that are available in a variety of sizes, shapes, and interchangeable configurations—enabling flexibility in the design of any wall project.

This brochure provides the details for including an access panel in a Concerto Wall System. Please contact ACGI or your ACGI Sales Representative for custom applications or specific requirements.

Step 1—Bottom Row

- 1) Install PT-100 on wall perimeter (sides and bottom).
- 2) Install A1 with SP-100 to right panel edge.
- 3) Install B1 with WT-100 above both A1 and B1.
- 4) Install E1 with SP-100 to left panel edge.
- 5) Install D1 with WT-100 above both E1 and D1.
- 6) Install SP-100 on right panel edge of B1 and left panel edge of D1.
- 7) Install C1 with WT-100 section above panel.

Step 2—Middle Row(s)

- 1) Install A2 with SP-100 to right panel edge.
- 2) Install B2 with WT-100 above both A2 and B2.
- 3) Install E2 with SP-100 to left panel edge.
- 4) Install D2 with WT-100 above both E2 and D2.
- 5) Install SP-100 on right panel edge of B2 and left panel edge of D2.
- 6) Install C2 with WT-100 section above panel.

Repeat for additional middle rows.

Step 3—Top Row

- 1) Install A3 with SP-100 to right panel edge.
- 2) Install E3 with SP-100 to left panel edge.
- 3) Hold B3 and D3 above WT-100 and angle panels into adjacent splines. Install SP-100 on right panel edge of B3 and left panel edge of D3. (See Top View)
- 4) Place C3 between B3 and D3. Press all three panels back to wall and slide onto WT-100.
- 5) Install PT-101 above A3 and B3. Install PT-101 above D3 and E3. Install PT-101 section above C3.

Install MT-100 to place trim.

Top Row—Alternative Method

- 1) Install A3 with SP-100 to right panel edge.
- 2) Install B3 with PT-101 above both A3 and B3.
- 3) Install E3 with SP-100 to left panel edge.
- 4) Install D3 with PT-101 above both D3 and E3.
- 5) Install SP-100 with adhesive on right panel edge of B3 and left panel edge of D3.
- 6) Field cut edges of C3. Angle panel onto WT-100 section, and press back to adhesive-treated splines.
- 7) Install PT-101 section above C3.

Install MT-100 to place trim.
